**CHESEBORO FIRE
BURNED AREA REPORT
FILE NO. 2-11.40**

Recommendation

No further action by Public Works is necessary.

Background

Fire Name: Cheseboro Fire
Date of Fire: June 25, 2006
Burned Area: 142 acres
Location: South of intersection at Cheseboro and Mount Emma Roads, north of Little Rock Reservoir, within unincorporated County of Los Angeles territory and the Angeles National Forest boundary near Palmdale. Refer to Thomas Guide Page 4377-C5 (2003 Edition). The burned area boundary is plotted on Attachment A.

Summary of Potential Sediment Impact

On July 5, 2006, Water Resources Division staff conducted a field reconnaissance of the burned area looking for residences and/or County facilities that could be potentially impacted by flooding/debris flows during storms. During a design storm event (50-year frequency), a water distribution canal and Cheseboro Road that run along the base of the canyon could be affected by mudflows. The water distribution canal is maintained by the Palmdale Water District and Mat Knudson of the District has been apprised of the situation. Also, Cheseboro Road is maintained by the Forest Service, and Karen Bauman has been contacted and apprised of the situation. There are no County facilities or residences which could be impacted by debris flows.
